JOHNNY WONDER

A. Your voice originates in a special place in your throat called the voice box, or "larynx." Two small bands of tissue stretch across the larynx. These are your vocal cords. Muscles in the larynx stretch and relax the vocal cords. When your vocal cords are relaxed, they form a V-shaped opening that lets the air through. When you speak, you tighten the vocal cords, narrowing the opening. Then, as your lungs drive air through the larynx, the air vibrates the tightened cords and sound results. The tongue, lips, and teeth also shape the sounds of the voice.

You can win a *World Almanac* if your question is selected. Send your name and age to JOHNNY WONDER, c/o this newspaper, P.O. Box 1258, Santa Cruz, CA 95061.
